# PhoneToPC Desktop

#### Step-1. Setup the PhoneToPC Desktop

- Download and install the PhoneToPC desktop application on your PC.
- Select the destination folder from "Set Location" where you want to save the transferred files.
- You can view a list of private Ips by clicking on the IP address, where a dropdown menu will appear displaying the available IPs.
- Select the IP of your host PC where the desktop app is installed.
   To select the IP, first click on "Stop", then select your PC IP and then click "Start".
- Ensure your PC and Android device are connected to the same Wi-Fi network.

# PhoneToPC via Android

### Step-1. Install the android app.

- Download and install the corresponding .apk file on your Android device from **Google Play Store** and open the app on your phone.

## Step-2. Connect Your Android to the PC

 You have two connection methods:
 Method 1: Scan Network– If both devices are on the same network, your phone can automatically detect the PhoneToPC desktop app.

Method 2: Enter the IP manually – Input the IP address of the PC into the "Enter IP address" field and hit "Save".

### Step-3. Selection of Media Files

- By clicking on "Select Photos", you can select both Videos and Photos. You can choose to send one or multiple media files. (Only limited to photos and videos).
- By clicking on "Select Directory", you can select an entire folder. You can choose to send one or multiple media files. (Only limited to photos and videos).
- Note: When selecting a directory, all videos and photos inside of its subdirectories will also be transferred.

#### © BNX Networks Confidential

- Choosing "Select Photos" will take you to the File Manager where you can select to send one or multiple media files.

20241104\_0310

20241104\_0309

 Choosing "Select Directory" will take you to the file manager as well where you need to select a folder and then click on "USE THIS FOLDER". If permission is asked, click on "ALLOW".

### Step-4. Transfer Process

- After clicking the desired photos/videos, you will be redirected to the home interface where it will show the selected media files.
- If you choose to remove any of the file, click on the bin icon.
- Click on "Upload" to start the transfer. The files will be uploaded and saved to the destination which was selected in the PhoneToPC desktop app via the "Set Location" button.
- It will show in the desktop app a log where it shows which files were transferred.
